

Blooming Marvellous

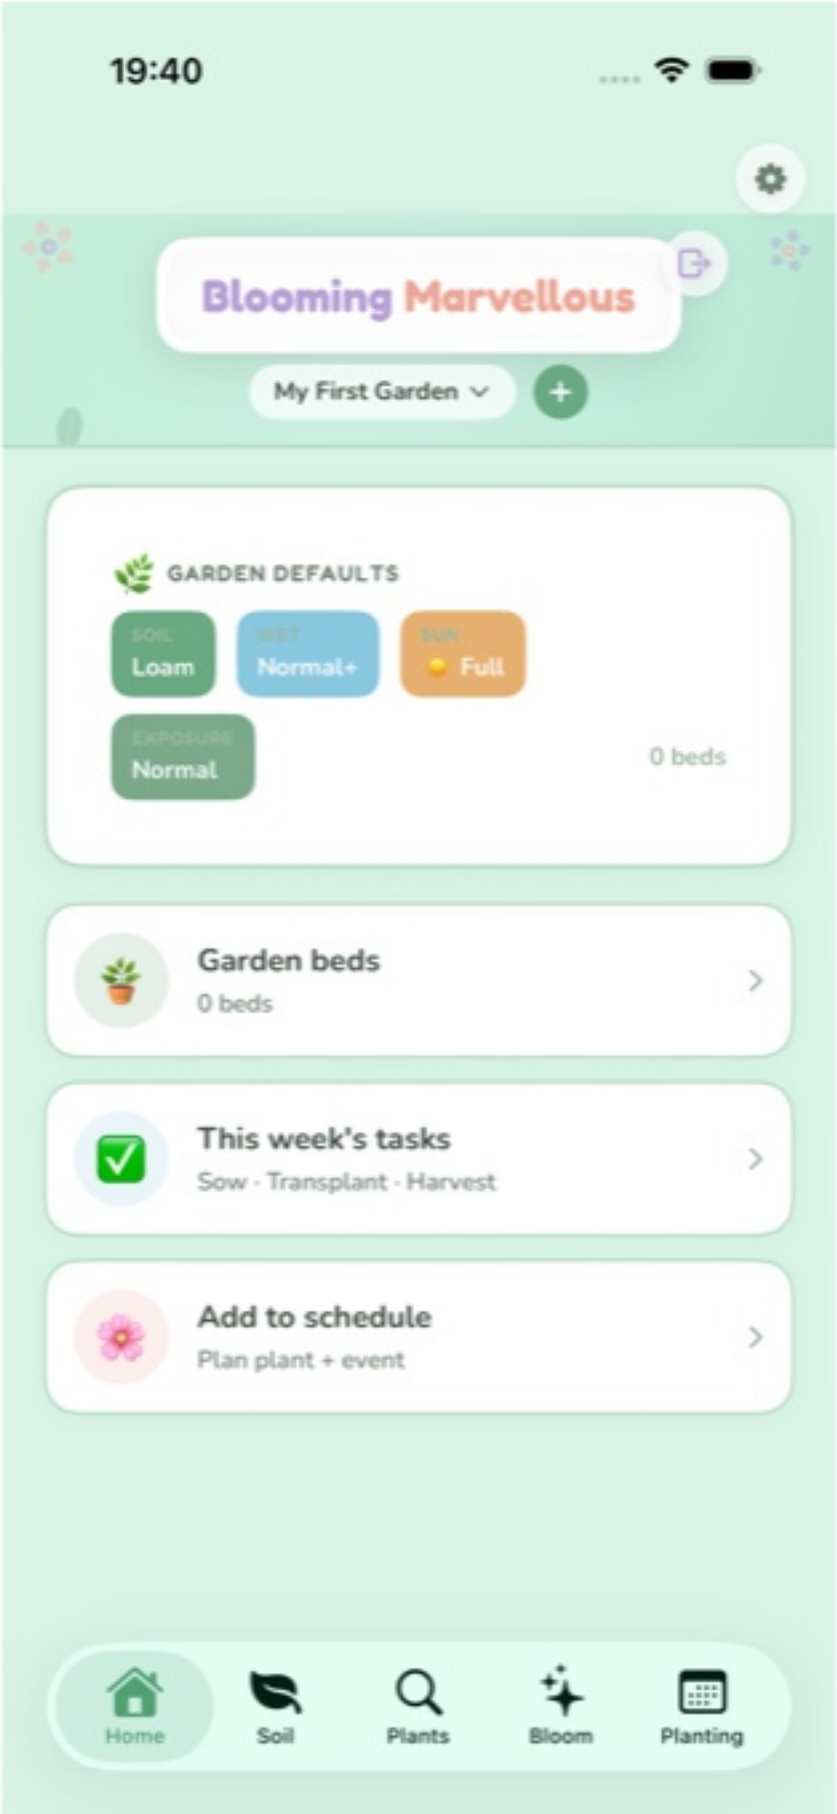

iOS app – wireframe-screen tour

Generated by ScreenshotTour XCUITest on iPhone 17 (iOS 26.5).
BM_AUTO_LOGIN bypasses the login screen so the tour can walk the
Home → Garden beds → Add bed → Tasks → Settings → Soil →
Plant Picker (Month → Gallery → Detail) → Bloom Schedule →
Planting Schedule + Add Event flow, then re-launches without
the bypass to capture Login + Sign Up.

Each screen below mirrors a wireframe panel from
BloomingMarvellousAppWireframes.pdf, restyled in the BMFinal
mint design system (sticker title, bmCard / stickerCard, Fredoka /
Nunito typography, flower + leaf decorations).

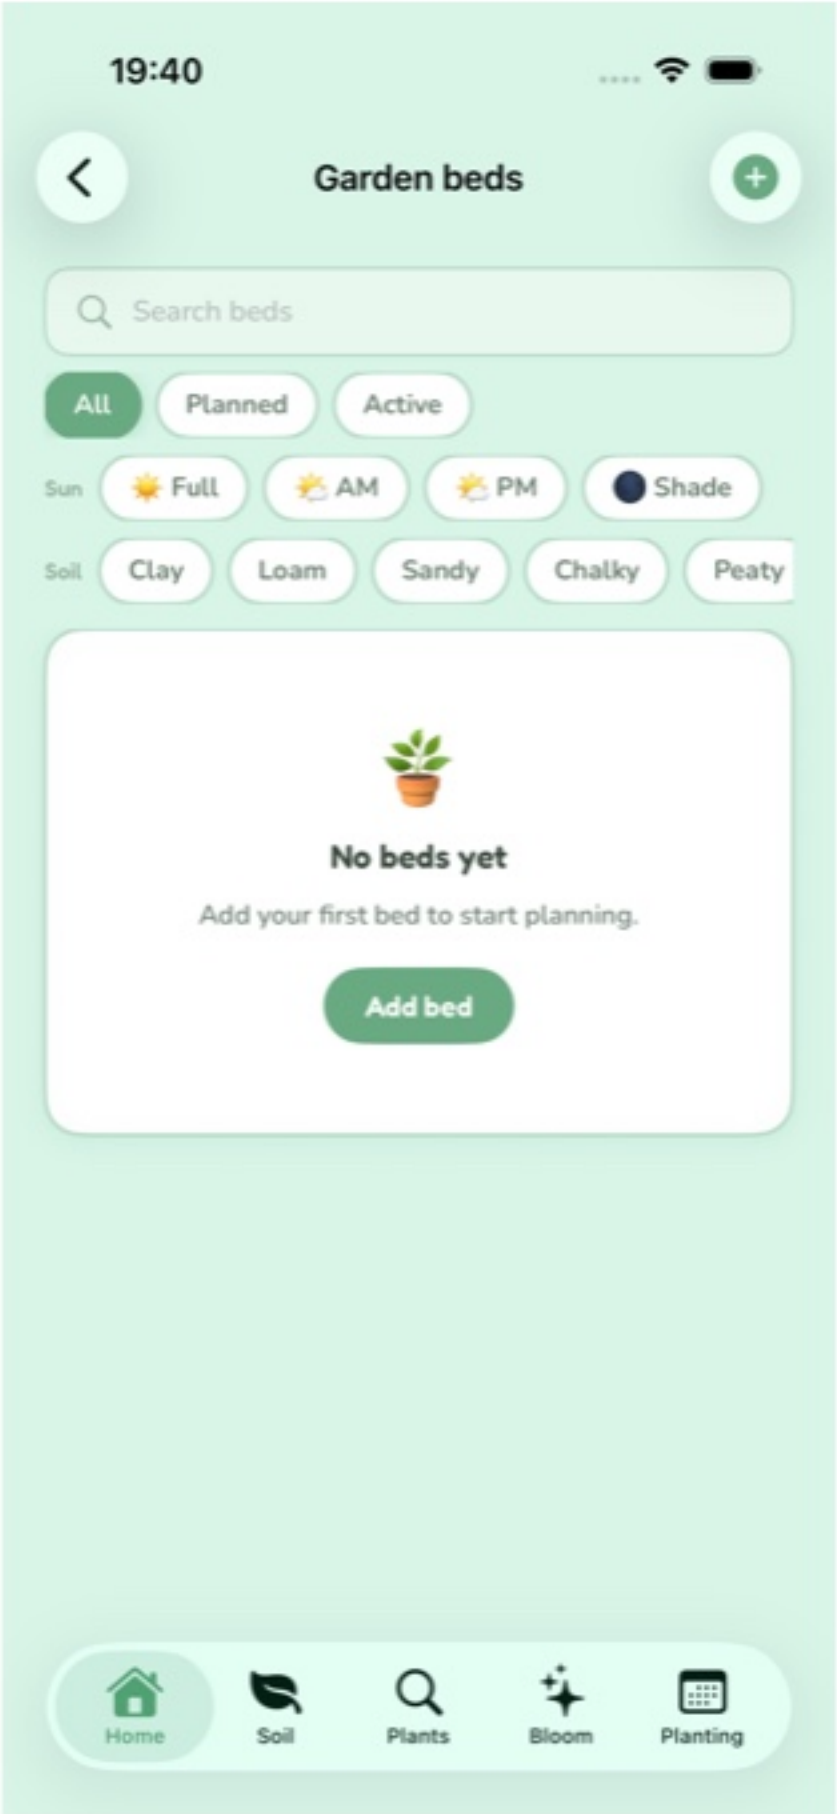

01-home

Home – Pro garden with shortcuts

02-garden-beds

Garden beds – search + status / sun / soil filters

03-add-bed

Add bed – name, garden, size, status, overrides

19:40

Cancel

Add bed
